

TREADS IN RED

Another interesting new innovation from Nathan Allan, "Color Finished Glass Treads." Color matching to other interior elements is now possible, choosing colors from our standard list or from a PMS chart. The glass treads for this project are engineered specifically for the project, and carry our unique Glass Sandpaper safety treatment on the walking surface. Glass Sandpaper has been laboratory tested for co-efficiency of friction, and extremely high test results were produced for both wet and dry conditions.

Nathan Allan strives to create products that are innovative, safe, and easy to clean. Glass Sandpaper Treads are another fine product from Nathan Allan; an Award Winning Company, and the clear cut leader in today's Cast Glass Industry.

Client: Danielson, Idaho
Architect: Mark Pynn, Idaho
Contractor: Ken Herich, Idaho
