

## Press Release: **Post Laminated Polish**

Summer is finally here and none too soon for our long awaited premium glass tread super polished edge treatment. "PLP" or Post Laminated Polished edges, are now available as a deluxe option to our stunning Glass Tread series, on both of our 2 layered and 3 layered options. PLP reduces the lamination line to the point where it is almost invisible when walking up a glass staircase. As well, the finished glass edge carries an extra shimmer and shine, which helps provide a near seamless appearance. Ideal for your most discerning clients!

### SPECIFICATIONS

**DIMENSIONS** up to 5'0 x 10'0 panels

**THICKNESS** typically 1/2", 5/8", or 3/4" layers

**GLASS TYPE** Clear, Low Iron, Tinted

**PATTERN** Omni (shown here), choice of 55 textures

**COLORS** color (standard or custom) finishes applied to the bottom surface

**SAFETY** Glass Sandpaper by Nathan Allan (glass particles fused to walking surface test highly for co-efficiency of friction ratings in both wet and dry conditions); glass treads come with an engineered stamped set of drawings/calculations

**LAMINATION** available in Polyurethane resin, or PVB vinyls

2 Layer PLP

3 Layer PLP
