ARROYO CLEAR SILVERED

PRODUCT INFORMATION

Arroyo Clear Silvered Textured Glass combines various architectural glass details into one final portrait. The Linear Flutes are produced in a wide pattern and lightly touched with our Sandstone texture. At the same time, the Flutes are formed into a wavy, corrugated shape, and separated by thin clear lines of pattern. On top of all this, our Arroyo Clear Silvered glass is laminated to a mirror back panel, which highlights and greatly enhances the minute details in the texture. Ideal for all cladding and wall mounting applications, this safety glass can be produced in clear or low iron glass, and in panels up to 5'0 x 10'0.

Application : Cladding, Doors, Feature Walls

Collection : Classic

Series : Directional

Glass Type : Clear / Low Iron, Bronze / Black

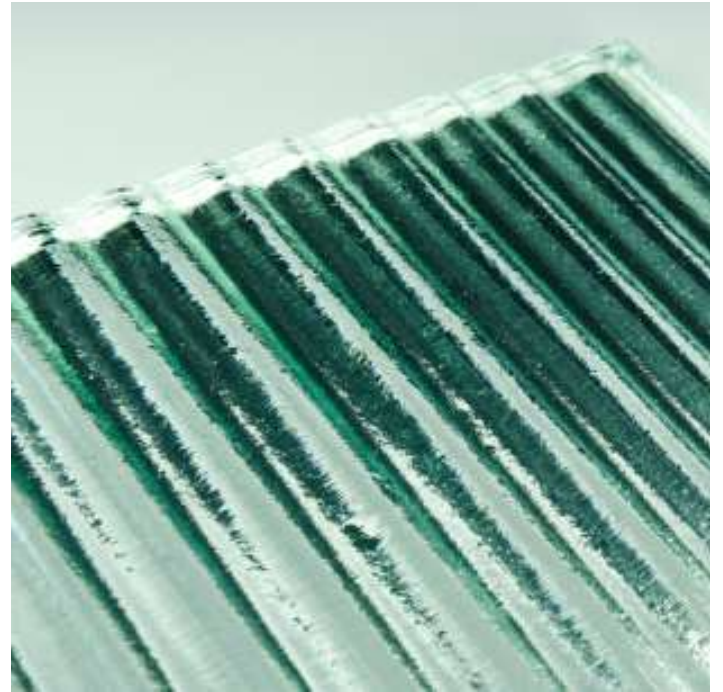

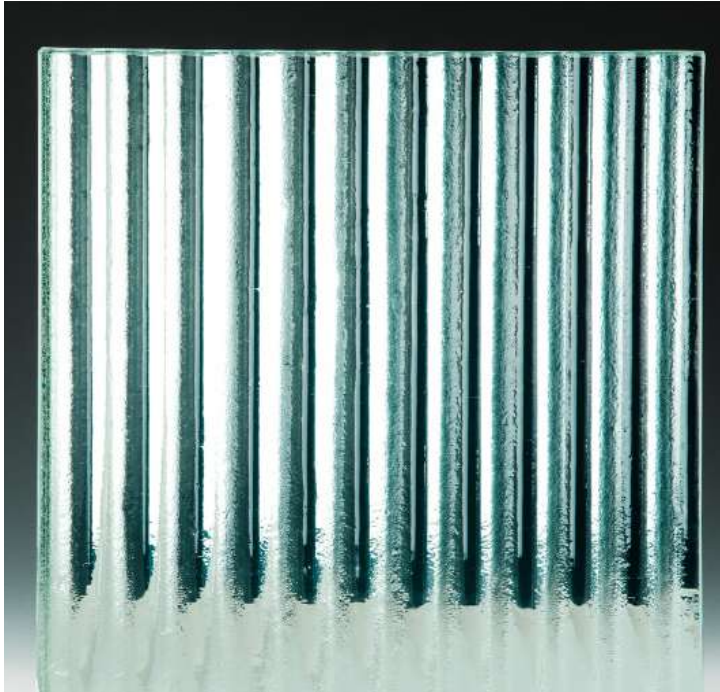

Finishes : Frosted or Etched
