

NATHAN ALLAN  
GLASS STUDIOS

CONVEX NEXUS

# PRODUCT INFORMATION

Convex Nexus Textured Glass patterns are produced and developed by Nathan Allan Glass Studios in collaboration with the prestigious architectural firms Janson/Goldstein NYC, Front Inc, and Joyce Wang, Hong Kong. Exploiting the potential for enhanced dimensionality in glass, the Convex Architectural Glass is produced in rectangular, square, circular, triangular, and custom pattern shapes. The deep protruding and recessed 3D surfaces, allows for dimensional viewing from both sides. Convex Architectural Glass can be produced in single layer tempered glass panels as well as double layered laminated glass panels. It is available in clear and low-iron glass. Color finishes and privacy coatings are also available.

---

# PROJECT DETAILS

## LOUIS VUITTON, BEIJING CHINA

Louis Vuitton Beijing China Architectural Glass Partitions. In the heart of the upscale Shin Kong Place in Beijing China, is Louis Vuitton's flagship store. Even with 900 international brands represented in kind, Louis Vuitton's latest enterprise stands out above them all. Therefore, as a high end designer brand, patrons are excited to visit and shop at this newly renovated establishment. At the same time, the new décor and design is ultra sheik, drawing in patrons who happen to be fortunate enough to walk by. Certainly a "must visit" for clientele who love the LV brand of merchandise!
