

VEER BRONZE TEXTURED GLASS

PRODUCT INFORMATION

Veer Bronze Textured Glass. Many of our Nathan Allan intriguing glass designs are developed through requests from interior designers and architects. Our Veer Bronze Textured Glass is a result of one of these requests. For a large commercial cladding project, one of our key architects asked if we could produce a Tin Roof design, using our kiln formed glass methods. After a few weeks of R&D, our Veer Bronze textured glass was created.

Veer Bronze Glass is linear in design, with rigid alternating channels. The zig zag effect in the design creates the tin roof like replication, and the profile of this glass is attractively extreme! Where tin is fully opaque, our Veer Textured glass is translucent, and allows for ample light transmission. This is ideal for any partition or feature wall, where the glass is viewable from both sides. For cladding applications, where opacity is required, frosted or opaque color finishes can be applied.

Make sure to view the individual design options, where Profile photos capture the authentic nature of this architectural glass.

Sawtooth (Mega, Mini, and Micro) – sink your teeth into distinctive highs and lows.

Veer (Organic and Satin) – crisp edges on one side and soft curves on the other.

Furrow – orderly rows softly ebb and flow on the surface, resulting in pinstriped privacy.

MAXIMUM PANEL SIZE	FEET	METERS
Annealed or Tempered	6 x 10	1.8 x 3.0
GLASS TYPES / THICKNESS	3/8" 10 MM	1/2" 12 MM
Clear	•	•
Low Iron	•	•
Edgework	Machine flat polished	
Color Finishes	Lucent, Gemstone, Pearl	
Privacy Finishes	Frosted or Etched	
Safety	Tempered or Laminated	
Cleaning	Our glass products can be cleaned with liquid cleaners and paper towels, or soft clothes. Liquid cleaners with out ammonia will help reduce streaks on the glass. Avoid all abrasive cleaning materials.
